Bevel clusters are displayed at 1/8” scale, unless otherwise indicated, to help you create that special window! Clusters from different manufacturers can be mixed.

Clusters are copyrighted by the manufacturer.
### Choice™ Clear and Glue Chip Bevels

Fine quality, machine-made bevels

- Glass thickness: 5 mil (3/16”) with 1/2” bevel width and 1/16” edge thickness.
- Each individually shrink-wrapped package contains a full-size pattern and cluster pieces.
- Choice™ bevel clusters are packaged on peggable blister cards for attractive, easy display.

Images on this page do not represent 1/8” scale.

Glue Chip Bevel — Size 13-1/2" to 51-1/2"
Infinity Bevels®
A Modular System of “Interlocking” Bevels and Bevel Clusters

Infinity® Bevels are uniquely designed to match up one with another to create endless design possibilities! All curves (both onside and outside) have the same 1½” radius and neatly fit one into another. Clusters that end in straight line bevels are based on 1” wide bevels spaced 2” apart so they can match up with another straight line cluster. Since clusters end in straight 1” bevels, they are compatible with straight line Choice bevels, so you have a wide range of lengths of finished bevels available to you for use in your designs. The bevels are of highest quality 3/16” plate glass with precision ground 1/2” bevels.

Books

INF B2294
176 pages

This book is an indispensable design guide for use with the Infinity line of bevel clusters, featuring hundreds of patterns incorporating multiple Infinity clusters as well as circles, arcs and Choice™ straight-line bevels. Patterns are shown with window dimensions as well as a listing of the clusters used in the design. The patterns can also serve as a basis for original designs using the modular Infinity Bevel System.

**Helpful Hints**

Images in the “Helpful Hints” section do not represent 1/8” scale.

**Hubs:** the most versatile cluster since you can add to it in any or all of the four directions.

**Crowns:** used either to continue a design or as a terminal end (only able to connect to other clusters at one end).

**Corners & Links:** designed as part of continuous pattern and can be added to in two directions.

It is also possible to use clusters for more than one function. For example, a hub can be used as a corner - in which case three hubs provide bevels for four corners.

Or a crown can act as a corner.

You can even miter bevels so they can be joined together in different ways.

**Bevels**

Bevels and Clusters are displayed at 1/8” scale.

Glassmith Studio Bevels

Nature Series Bevels offer realistic images to enhance the beauty of glass panels. These premium quality bevel clusters are manufactured on 3/16” (5mm) glass with a 1/2” (13mm) bevel. The clusters are high-polished to a brilliantly clear, smooth finish, creating their exceptional quality.

Some clusters contain glue-chipped areas to create added depth. Several clusters are beveled colored glass. Create window and panels using these exciting clusters or use them with designs from the Glassmith Studio books.
